

VINTAGE NUT PLATES

Boots (Wing) "Spring Locking Nut" Information

According to an "original" Boots Aircraft Nut Corporation's catalog. . .

"The All Metal Spring Locking Principle and One-Piece Construction of Boots Self-Locking Nuts provide permanent reusable fastening wherever vibration occurs."

The All Metal Principle assures:

- Safe, tight bolt and screw connections
- Longer equipment life and lower maintenance cost
- Complete reusability without loss of locking efficiency

The One Piece Construction:

- Makes them quick and easy to apply
- Eliminates danger of omitting locking auxiliary
- Gives a lighter, more economical and easier to handle self locking nut

****Disclaimer:** All items sold are in original new surplus condition. This is a collection from surplus aircraft parts inventories gathered over 45 years. Items sold are without certs or traceability and there is no warranty or guarantee expressed or implied.
