

VINTAGE NUT PLATES

Fiberlock or Nylon Insert Information

According to an original Elastic Stop Nut Corporation of America (ESNA) Catalog. . .

- "Under normal operating conditions, the red fiber insert provides completely satisfactory and economical locking effectiveness, retaining its locking torque for a minimum of 15 installations and removals."
- They were also made with red nylon inserts, which were good for fifty installations and removals.

Another advantage in using types with Fiber or Nylon Locking Inserts is that you can reuse them over and over again without damaging the screw or bolt threads.

****Disclaimer:** All items sold are in original new surplus condition. This is a collection from surplus aircraft parts inventories gathered over 45 years. Items sold are without certs or traceability and there is no warranty or guarantee expressed or implied.
