

VINTAGE NUT PLATES

“Metal Locking Insert” Information

These are similar to the Fiber/Nylon type, except they have a metal locking insert in them as opposed to the non metallic insert. This feature makes them useable in higher temperature applications.

****Disclaimer:** All items sold are in original new surplus condition. This is a collection from surplus aircraft parts inventories gathered over 45 years. Items sold are without certs or traceability and there is no warranty or guarantee expressed or implied.
